

Part C: Answer the questions below:

1. Create a model to describe how water would flow over the landforms below.

Make sure your observation includes:

- (1) water and
- (2) arrows showing the movement of water.

Why did the water move the way it did?

2. Does this evidence support your prediction? Why or Why not?

.....

.....

Why did the water move? How do you know?

.....

.....

What real-world Earth components does each of the part of the model represent?

.....

.....

.....

.....
